

# Science Activities for the Elementary Classroom Teacher Grades K-5

Participating teachers will perform science activities that will help their students acquire basic skills in inquiry science. Based on the New York State Science Standards, inquiry and process skills such as classifying, gathering and organizing data, inferring, interpreting data, measuring, observing, manipulating materials and other skills will be practiced.

These activities can be immediately implemented into the classroom. This is an opportunity for teachers to enrich their methodology by having students perform science activities. This course has been designed for both the new and experienced teachers and these skills will be needed for the ELS Grade 4 Science assessment.

**Bob Plaia** is a career educator who began his career as a science teacher in the junior high school and high school arenas. He has taught biology, chemistry, earth science, physics, and health. Having served as a science department chairperson, Assistant Principal, Principal and Assistant Superintendent of schools, he retired in 1995 and is currently serving Western Suffolk BOCES as its Science Consultant.
