

Math Works:

Games, Puzzles and Diversions for the Classroom

Games create a stimulating, creative way to teach basic skills and concepts. Reaching the national and state standards is a goal for all students. Some students may have difficulty achieving this goal. This workshop will give the participants an opportunity to create activities and math games which use a multi sensory approach to learning. The participants will use and coordinate existing games to state standards. They will learn how to expand learning through gaming to generate efficient computational skills and expand problem solving and reasoning abilities. The games used will reinforce major concepts and skills in number, number operations, geometry, measurement, probability, algebra and problem solving.

John Hinton has forty years of experience in both the United States and Canada. He has taught at every educational level from elementary school to college. He currently teaches math methods at CW Post. He has also taught at Hofstra University and St. John's University. He is the author of several books on mathematics including: *Math Works*, *Math Encounters*, *Math Links*, *Reasoning Only* and *Seven before 7*. He is a national consultant and has conducted numerous workshops and seminars on mathematics throughout the United States and Canada.
