

Differentiating Math Instruction for Multiple Intelligences

This workshop will focus on strategies and techniques to help all students successfully meet the newly revised state math standards. A variety of visuals, models and manipulatives will be created to fit each of the five content and five process standards for both primary and the middle grades. The participants will be engaged in hands-on learning activities which can be used immediately. Teaching strategies will be

modified to accommodate multiple intelligences, learning styles and higher levels of learning and more complex concept formations. Each participant will receive a packet of learning activities correlated to the state curriculum and referenced to Bloom's level of cognitive thought and Gardner's multiple intelligences.

John Hinton has forty years of experience in both the United States and Canada. He has taught at every educational level from elementary school to college. He currently teaches math methods at CW Post. He has also taught at Hofstra University and St. John's University.

He is the author of several books on mathematics including: *Math Works*, *Math Encounters*, *Math Links*, *Reasoning Only* and *Seven before 7*. He is a national consultant and has conducted numerous workshops and seminars on mathematics throughout the United States and Canada.
