

ELA/Math/Science - All of the Above Addressing Multiple Content Areas

*****A must for Special Education and ESL Teachers*****

More and more is being added to the curricula that you teach, yet nothing is required to be removed. The length of the day is the same and so is the school year, so how does one do it? Make the most of instructional time by addressing multiple content areas; integrate ELA and math concepts into your science lessons.

Participants in this workshop will spend the day involved in hands-on learning experiences which integrate standards-based ELA and Math concepts into your science curriculum. All of the activities can be adjusted for students of different ability, different grade levels and for those students who speak different languages.

Bob Plaia is a career educator who began his career as a science teacher in the junior high school and high school arenas. He has taught biology, chemistry, earth science, physics, and health. Having served as a science department chairperson, Assistant Principal, Principal and Assistant Superintendent of schools, he retired in 1995 and is currently serving Western Suffolk BOCES as its Science Consultant.
