

Mathematics Regents Assessments at the "Mastery Level" (Algebra, Geometry & Algebra 2)

Often the mathematics sessions we attend give the majority of time to the "struggling" student, the "unmotivated" student and how to get them to achieve success. This session will focus on getting students to the "Mastery Level". The agenda of this session will cover:

- Problems (representing learning standards) from the NYS "Sample Tasks"
- Supplementary topics to embellish the required topics
- Projects and presentations related to topics
- Marzano's "Classroom Instruction that Works" applied to the Mastery Student
- A review to prepare for Mastery on the Assessment
- Connecting topics

Lawrence Farrell is a former mathematics teacher with 30 years experience. His career spans from teaching Algebra, Geometry and Algebra II/ Trigonometry through the Sequential Mathematics curriculum to Math A/Math B. He has expertise in various teaching styles and practical strategies in developing mathematical topics. He is presently focusing on the NYS Curriculum and Standards for Geometry. He has spent the past year administering sessions at BOCES and various school districts. "New sessions must be developed to keep mathematics teachers current and motivated". His approach has been and will continue to be asking the question, "What is needed?" followed by a "nuts and bolts" practical approach in responding.
