

Earth Science Regents - Understanding and Teaching the Reference Tables

It is estimated that 30% of the Earth Science Regents Examination involves the interpretation and application of concepts contained in the Earth Science Reference Charts. This workshop has been designed to explore successful strategies for teaching the uses and understandings of these charts to students in the classroom.

Participants will be encouraged to share their experience and techniques as well as those of the instructor. We cannot guarantee that student scores will increase on the Regents exam by attendance at this workshop, however, we can assure you that there will be an increase in your methodology in teaching Earth Science.

A complete comparison between the old and new reference tables will be distributed to all participants.
