

Efficiently Teaching Algebra 2 & Trigonometry

We've seen the Sampler, the June and August assessments; so how are we going to teach Algebra 2 & Trigonometry? This course presents some particular challenges: an enterprising curriculum, a curriculum weighted rather heavily with respect to the other Regents courses, an exam that contains 70 credits of 2 point responses and a student who has attained "success" by passing two "less than rigorous" minimal New York State Assessments.

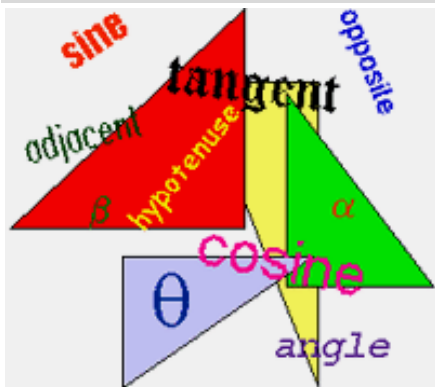

So, what do we do? Teach the course as efficiently as possible. In this session we will examine and discuss the following:

- The order of topics (functions work better than factoring)
- Teaching "today's" lesson with "tomorrow" in mind
- Exploring assignments that address topics not covered in class
- Using Marzano's Advanced Organization for both introduction and efficiency
- Learning how to take a "short answer" exam
- Alternative methods of solution to assist students with weakness in particular topics
- Scoring partial credit

Lawrence Farrell is a former mathematics teacher with 30 years experience. His career spans from teaching Algebra, Geometry and Algebra II/ Trigonometry through the Sequential Mathematics curriculum to Math A/Math B. He has taught at all levels and "tracks" of mathematics from 7th Grade Math to Calculus. He has expertise in various teaching styles and practical strategies in developing mathematical topics. He is presently focusing on the implementation of the new NYS Curriculum and Standards. He has spent the last two years administering sessions at BOCES and various school districts. Lawrence Farrell is also the Mathematics Consultant for Western Suffolk BOCES. "New sessions must be developed to keep mathematics teachers current and motivated". His approach has been and will continue to be asking the question, "What is needed?", followed by a "nuts and bolts" practical approach in responding.
